PROFESSIONAL SUMMARY

Full-stack developer and AI engineer with hands-on experience building production-grade multi-agent LLM systems, RAG pipelines, and cross-platform mobile applications. Delivered deployed projects spanning Next.js, FastAPI, React Native, and ChromaDB. Certified in OCI Generative AI and AWS. Proven track record in problem-solving and stakeholder collaboration — backed by a 1st-place coding win among 10,000+ participants and 2,000+ published technical views.

EDUCATION

Vellore Institute of Technology

2021 – 2025

B.Tech in Computer Science, Specialization in Cyber Security & Digital Forensics

TECHNICAL SKILLS

Full-Stack Development: JavaScript, TypeScript, Python, React.js, Next.js, FastAPI, Node.js, PostgreSQL, REST APIs

AI / ML Engineering: OpenAI, RAG Pipelines, LSTM, DistilBERT

Cloud, DevOps & Tools: Docker, AWS, OCI GenAI, Git, Postman, Razorpay/Stripe, Tailwind CSS

EXPERIENCE

Full Stack Developer Intern

November 2025 – March 2026

The BrightLayer

Remote

- Built a full-stack MVP with REST APIs and Razorpay/Stripe payment integration, supporting multi-role dashboards for users, experts, and admins.
- Designed relational database schema and managed data workflows using SQL for user, expert, and transaction management.
- Collaborated with cross-functional stakeholders to translate business requirements into scalable product features and backend systems.

Frontend Developer

June 2022 – June 2024

Microsoft Technical Club, VIT

Remote

- Developed a dynamic event registration page for AdVITYa college fest, enabling seamless sign-ups for 500+ attendees across multiple technical events.
- Collaborated with a cross-functional team of 8 to optimize frontend performance, achieving **30% faster load times** through responsive design and code optimization.

PROJECTS

SmartMinutes | [Link](#)

Next.js, ReactJS, TypeScript, FastAPI

- Architected a **5-agent AI system** (Transcription, Diarization, Summarization, Action Extraction, RAG Retrieval) coordinated via a central orchestrator for production-grade LLM pipelines.
- Built a Next.js dashboard with drag-and-drop media upload, live agent logs, speaker analytics, and a RAG search console with cosine similarity scoring and cited LLM responses.
- Designed a PostgreSQL schema and FastAPI backend with JWT authentication and Celery task queues.

FeedFlow | [Link](#)

React Native, JavaScript, Context API, Animated API

- Built a React Native + Expo mobile app for personalized Instagram feed curation via preference-driven automation and intelligent content filtering.
- Developed an **interactive Feed Simulator** where boosted posts glow with auto-like animations, while muted posts blur and auto-scroll with countdown overlays in real time.
- Engineered a multi-rule automation engine (Auto-Like, Save, Comment, View) with “Personalization Hours” scheduling and global state synchronization via React Context API across all screens.

CERTIFICATIONS & TRAINING

- OCI Certified Generative AI Professional – Oracle Cloud Infrastructure (August 2025)
- AWS Solutions Architect Associate – Amazon Web Services (February 2024)
- Salesforce Developer Virtual Internship – Salesforce (July – August 2024)
- Applied Machine Learning in Python – Coursera (February 2023)
- Android App Development – SmartInternz (November 2023)
- Cyber Security Services Certification – Industry Training Program

ACHIEVEMENTS & LEADERSHIP

- McKinsey Forward Program:** Selected for McKinsey & Company’s leadership development program covering strategic thinking, problem-solving frameworks, and business acumen.
- Coding Competition Winner:** Secured **1st place** in the 21-Day Coding Challenge by Deutsche Bank & GeeksForGeeks among 10,000+ participants.
- Technical Writing:** Published 5+ articles on GeeksForGeeks with **2,000+ cumulative views** on data structures, algorithms, and machine learning concepts.
